

Arecont Vision Update

October 2016

Leading the Way in Megapixel Video

- 3Q16 Record Results!
- Promotions and Job Expansion: Parker, Sessa, Wallace, Bujarski, Barry, LaValley, S. Kennedy, Cooper, Schimpf
- New people on-board in sales, engineering and services: Jeremiah, Jason P., Dave, Steve K., Felipe, Alex, Johan, Ahmed, Estaban
- New products are shipping!
- Continued Progress with VMS/NVR Partner business alignment, integration, projects/orders, events, training and execution
- Project Registration is a terrific tool, not just for pricing but also for project identification and protection.
- Quality and Service continue strong improvement and the results show it.
- Operations, Assembly, Distribution new layout at our WHQ.
- Customer Satisfaction continued improvement and the results are outstanding!

ARECONT VISION MEGAVERTICAL PRESENTATIONS

Arecont Vision Cameras at Work in Banks

Leading the Way in Megapixel Video™

- Programs released.
 - Try&Buy Program
 - Extended for Multi-Sensor Products
 - Expanded for 4K and Flex
 - Special Pricing Program on GEN1 via Project Registrations
- New support programs in place to drive better service for our customers.
- SI/dealers should sign up for service parts/demo agreements. That way we can ship immediately and we will not require a credit card. It is fast and simple to do.
- Our new products are shipping now!

Product Update

MegaVideo® Flex

Ultra Low Profile Design Solution

Highlighted New Features Include:

- 1.2MP, 1080p, 3MP, and 5MP H.264 Remote Focus True Day/Night Indoor/Outdoor Tethered IP Cameras
- Camera Sensor and Main Unit can be Connected via a USB Cable up to 40ft in Length
- Optional IR LEDs

MegaDome® 4K

8.3 Megapixels at 30fps!

4K

Highlights:

- 4K Ultra High Resolution Image Quality
- 8.3MP H.264 True Day/Night Indoor/Outdoor Dome IP Cameras
- 30 Frames per Second
- New Easy-to-Install Housing Design

GEN5
Megapixel IP Cameras

4K Resolution

Integrated Motorized
Lens with Remote
Focus and Zoom

P-Iris Control for
Best Depth of Field
and Image Clarity

True Day/Night
with IR Cut Filter

CorridorView™
with 90° Image Flip

IR LEDs

SDHC Card Slot

Impact / Weather Resistant
IK-10 and IP66 Rated

All-in-One PoE
and Integrated Lens

SNAPstream™

Smart Noise Adaptation & Processing

- Smart H.264 Codec Enhancement
- Updateable on Most Legacy Cameras
- Reduces Bandwidth Without Impacting Image Quality

SNAPstream™

AV MegaView 1080p @ Default Settings
30 FPS 2.2 Mb/s

AV MegaView 1080p @ Default Settings
with **SNAPstream**
30 FPS 0.5 Mb/s

SNAPstream™

AV MegaView 1080p @ Default Settings
21 FPS 10 Mb/s

AV MegaView 1080p @ Default Settings
with **SNAPstream**
21 FPS 2.4 Mb/s

MicroDome® Duo

2 User-Configurable Sensors in an Omni-Directional All-in-One Solution

Highlighted Features Include:

- 2 Sensor Omni Camera
- Remote Focus – Still Able To Change Lenses
- 3 Axis Gimbals
- Discrete and Low Profile
- Fast Frame Rates

MicroDome® Duo

Tech Tips and Tricks

Bit rate and control options for Arecont Vision cameras

What is a bit rate?

- Video data rates from IP surveillance cameras to viewing or recording devices across a network are typically measured in bits per second
- So as example a video stream equal to 1 megabyte per second would be given as a bitrate of 8 megabits per second
- 8 bits in a byte, this can sometimes be confusing since storage is typically measured in bytes

What is a reasonable bit rate to expect?

- Bit rates can vary widely depending on video compression, resolution, scene content, and scene lighting
- As base line example a typical 1080p Movie streamed using H.264 over a network at 30 frames per second can have an average bit rate ranging around 5000 to 20,000 kbps depending on the codecs used and amount of scene change
- But its important to remember this is not live video and has been optimized in production process
- Live surveillance videos have a lot more bit rate variation and factors like scene activity, lighting, and user settings such as image quality and exposure mode come into play as well

- Bit rate control is a method of maintaining consistent bitrates for MPEG compression
- It can help control bandwidth usage but often at the cost of reducing video quality
- Works by compressing images as bitrates increase, and reducing fps to maintain limits

Option – Bit Rate control

Arecont Vision

beyond imagination

Image Video **H.264** Focus Network Motion Detection Privacy Mask Administration About

Model 2115DN
Firmware 65221
MAC 00-1A-07-02-63-C7

H.264

H.264 RTSP/RTP/AVP stream

RTSP Unicast port: 554

☒ Variable Bitrate Control

H.264 Quality (36..16): 20

☒ Enable Rate Limit

Rate limit (0-65535 kbps): 10000

☐ Constant Bitrate Control

Bitrate (0-65535 kbps): 0

Frames per second:

☐ Enable Microphone

Link for external media players:
<rtsp://10.10.3.16/h264.sdp?res=half8x0=0&y>

* "Preview" will not apply changes to the camera
* "Apply" will apply changes to the camera: Click
"Save all settings to flash" in administration section
to save all changes

RTP/UDP multicast stream

☐ Enable RTP Multicast

IP Address: 232.0.0.2

RTP Port: 1234

SAP Destination IP: 224.2.127.254

- Allows setting of the H.264 image quality level
- The selected image quality level will be maintained, but bit rate will be ignored
- This yields a lower average bit rate but allows bit rate variation when scene content has high amount of change

- When selected the camera will automatically apply image compression to keep bit rate at the set level
- With rate limit, image quality will change as compression is automatically adjusted by the camera to keep bit rate at the defined level

Consider compression vs. Resolution

Low Compression

High Compression

- Optimizes image settings for best possible bit rate with least impact on image quality
- Not the same as bit rate control, but can work in conjunction with it
- When active there is some trade off in color value and image sharpness
- Can reduce bit rate as much as 50% from default settings

Option – Bandwidth Savings mode
