The New Arecont Vision Costar was launched by Costar Technologies, Inc. on July 13, 2018

Industry editorial coverage of Arecont Vision Costar launch

**The original company brings 15 years of
award-winning megapixel video innovation &
security industry leadership**

More industry-firsts in new product capabilities, features, & designs than any other video surveillance product vendor

2004

World's Fastest 2 Megapixel Network IP Cameras

In April 2004, shortly after launching the company, Arecont Vision® released its first generation of cameras that included the world's fastest 2MP network camera.

We are focused on the needs of our customers

**And we acted upon what they told us to
continue earning their business**

Here's what we are doing...

We've added to our sales team around the world to increase pre-sales support to our customers & partners

We've completely overhauled the Partner Portal to provide the tools & resources our partners need, all in one place

Your Best Resource for All Things
Arecont Vision Costar

A graphic for the Partner Portal. It features the AV Costar logo on the left, which consists of a circle containing 'AV' above 'COSTAR'. To the right of the logo is a photograph of a security camera mounted on a wall, with an American flag visible in the background. The words 'Partner Portal' are overlaid in large, bold, red font across the center of the image.

Who We Are.

Company.

Arecont Vision Costar, LLC launched in July 2018, built upon the video leadership of the original Arecont Vision, Inc. in 2003 and now combined with the expertise of Star Technologies, Inc. The new Arecont Vision Costar brings the Total Video Solution™ to a wide range of vertical market surveillance needs across the security industry. The Solution is a complete system composed of the industry's best single-, dual-, and multi-sensor megapixel cameras (MegaPi™, dual, and ConteraPi™), cloud-enabled video management system (ConteraVMS™), recurring revenue generating web services (ConteraWS™), and cloud-managed video recorders (ConteraCMR™). Each product set can also be used individually, integrated with other leading security industry software and hardware through both ONVIF compliance and use of the Arecont Vision Applications Programming Interface (API).

What We Do.

Our Total Video Surveillance Solution.

Made in the USA

Arecont Vision Costar products are designed and manufactured in the United States. A subset of our products are designed in the US but assembled elsewhere.

Arecont Vision Costar products include: MegaPi™, MegaDome™, MegaVideo™, ConteraDome™, and SurroundVideo™ (4 models), and both ConteraVMS™ and ConteraWS™ software families are Buy American Act (41 CFR 101-11.6) and Federal Trade Commission Made in USA compliant with few exceptions.

Arecont Vision products are also compliant with the Buy American and Buy American and Buy American Act (41 CFR 101-11.6) for manufactured goods (click to view online at www.fedreg.gov), as signed on April 18, 2017.

Download the compliance statements.

- Made in USA Compliance – Cameras
- Made in USA Compliance – VMS & NVRs/Servers

Arecont Vision for more information on product and accessory compliance: Arecont Vision is a Registered US Federal Contractor.

American-Made Quality & Design

For customers in the United States, if you are planning video surveillance camera purchases, please select your camera designed and built in the USA choice, Arecont Vision. Arecont Vision Costar offers the widest range of Made in USA megapixel cameras with our Mega series, as well as our software options and many of our NVR/server platforms.

Customers outside the United States can trust Arecont Vision for award-winning products and customer service proven worldwide for true Made in USA quality and innovation.

We've even built a new online Total Video Solution system configuration design tool

ConteraSysCon™ System Configurator
