

# Wide Temperature 75W PoE 802.3bt Supply

PoE++ bt Class 5 injector, 75 watts, 100-240vac input, TS2 rated US AC cord

The 7412007-006 is a single port PoE Injector with a wide temperature range and surge suppression for complex high-power requirements. It provides 55VDC, 1.36A power to remote devices over 4 pairs with 6kV (10/700µs) surge protection and supports 10/100/1000Mbps data speed. Compatible with IEEE 802.3af/at/bt compliant 75W PoE devices, such as high-power cameras, wireless access points, base stations, door locks, displays, POS, information kiosks, and other high-power Ethernet terminals.

The 7412007-006, is designed for indoor use and can be used outdoors when placed inside a waterproof box. It operates with power inputs of 100-240VAC and at temperatures between -29.2 to 165.2°F (-34 to 74°C) at full load. The 7412007-006 has a high-reliability detection chip inside, which detects and classifies PoE devices before powering them and will not provide power until a compliant device is detected. The 7412007-006 has a maximum power distance of 328ft (100m) over Cat5e/Cat6 cables.
