## About Our Warranty

### Global (3 Year) Limited Warranty

AV COSTAR warrants to Purchaser (and only Purchaser) (the “Limited Warranty”), that: (a) each Product shall be free from material defects in material and workmanship for a period of thirty-six (36) months from the date of shipment (the “Warranty Period”); (b) during the Warranty Period, the Products will materially conform with the specification in the applicable documentation; (c) all licensed programs accompanying the Product (the “Licensed Programs”) will materially conform with applicable specifications. AV COSTAR warrants to Purchaser (and only Purchaser) (the “Limited Warranty”), that: (a) each Product shall be free from material defects in material and workmanship for a period of thirty-six (36) months from the date of shipment (the “Warranty Period”); (b) during the Warranty Period, the Products will materially conform with the specification in the applicable documentation; (c) all licensed programs accompanying the Product (the “Licensed Programs”) will materially conform with applicable specifications.

AV COSTAR warrants to Purchaser (and only Purchaser) (the “Limited Warranty”), that: (a) each Product shall be free from material defects in material and workmanship for a period of thirty-six (36) months from the date of shipment (the “Warranty Period”); (b) during the Warranty Period, the Products will materially conform with the specification in the applicable documentation; (c) all licensed programs accompanying the Product (the “Licensed Programs”) will materially conform with applicable specifications.

During the Warranty Period, the Products will materially conform with the specification in the applicable documentation; (c) all licensed programs accompanying the Product (the “Licensed Programs”) will materially conform with applicable specifications.

# ConteralP Indoor Dome Megapixel Cameras

## Camera Overview

The ConteralP® Indoor Dome megapixel camera features 2.1(1080p) and 5-megapixel (MP) resolution for optimum performance. The ConteralP Indoor Dome combines a day/night mechanical IR cut filter with an integrated motorized remote focus and zoom lens for excellent, optimal image quality.

Regardless of the time of day, the ConteralP Indoor Dome is prepared for any lighting condition. For applications with poor lighting conditions, Enhanced WDR™ (wide dynamic range) at 120dB provides the best visual balance to shaded and bright light conditions.

For clear color images in low-light, NightView™ offers strong low-light sensitivity for capturing details in extremely poor-lit scenes. Built-in Smart IR LED illumination automatically adjusts output in response to the distance of an object in view to prevent over-exposure when the object is very close to the camera. AV Costar was the first to bring H.264 to the mainstream market and recently developed SNAPstream™ (Smart Noise Adaptation and Processing) technology for reducing bandwidth without impacting image quality. Today we are proud to offer our next generation H.265 with SNAPstream+™ smart codec capable of delivering high quality video while saving over 50% of the data rate to reduce or prevent strain on the network.

The MicroSDXC card slot supports up to 1TB of storage capacity for convenient onboard storage. The camera's power can be supplied via a Power-over-Ethernet (PoE - IEEE 802.3af) compliant network cable connection.

The ConteralP Indoor Dome is ONVIF (Open Network Video Interface Forum) Profile S, G, and T compliant, providing interoperability between network video products regardless of manufacturer.

**CAUTION!**

1. Do not attempt to service a damaged unit yourself. Refer all servicing to qualified service personnel.
2. Wiring methods shall be in accordance with the National Electrical Code/NFPA 70/ANSI, and with all local codes and authorities having jurisdiction. Wiring should be UL Listed and/or Recognized wire suitable for the application.
3. Always use hardware e.g. screws, anchors, bolts, locking nuts etc. which are compatible with mounting surface and of sufficient length and construction to insure a secure mount.

## Package Contents

Description	QTY
AV02CID-200/ AV02CID-201/ AV05CID-200/ AV05CID-201 IP camera	1

## Installation

No.	Description
1	Supplied Drywall Anchors
2	ConteralP Indoor Dome Camera
3	Supplied Screws
4	Supplied Set Screw
5	Camera Dome Cover

1. Determine a secure location to mount the camera
2. Use the template, anchors, and screws provided to prepare the mounting provisions for the camera installation.
3. Install three supplied dry wall anchors using the supplied mounting template
4. Remove the camera dome cover by hand
5. Connect the network, power, audio, and alarm cables as required.
6. (If necessary) Install a MicroSDXC card in the camera
  - a. *Note: You can access files in the SD card via FTP.*

2MP (1080p) Models

5MP Models

7. Align three supplied screws with the dry wall anchors and screw the ConteralP Indoor Dome camera into place.
8. To configure the camera, reference the camera discovery, set-up and configuration section.

9. Follow below instruction to adjust the Pan/ Tilt and rotate the gimbal for the desired field of view.

10. To adjust the zoom and focus, see the “Zoom and Focus” Section of this manual.  
11. Install the camera dome cover back once you finish all the above steps. Please make sure you align the marks on the camera and the dome cover.

12. Fasten a supplied screw on the dome cover to secure it.

## Accessories

AV Costar offers various mounting solutions for the ConteralP Indoor Dome series of cameras that provide wall, pendant, and corner mounting options as well as a color change snap-on cover to convert the camera to black. Please visit the camera models' webpage on [www.avcostar.com](http://www.avcostar.com) or contact your local sales representative for information on all accessories.

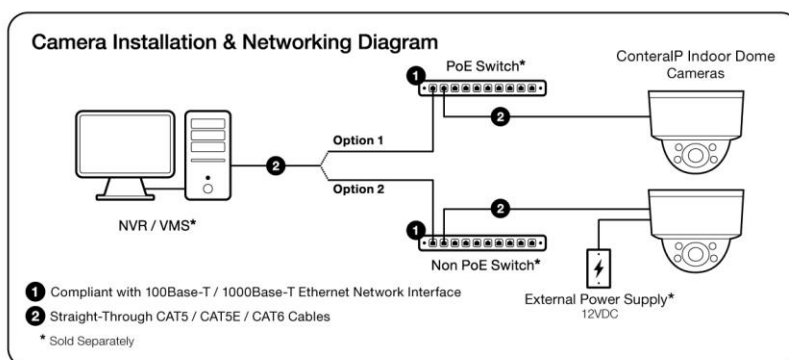

Model Number	Description
AV-CRMA-W	Corner Mount Adapter (AV Costar White)
AV-PMA-W	Pole Mount Adapter (AV Costar White)
CID-CMT-W	Pendant Mount for ConteralP Indoor Dome (AV Costar White)
CID-FMA	ConteralP Indoor Dome Flush Mount Adapter (White)
CID-WMT-W	Wall Mount for ConteralP Indoor Dome (AV Costar White)
CID-200COVER-B	Color Change Snap-On Cover (Black)

## Camera Power Up

**CAUTION!** This product should be installed by a qualified service technician in accordance with the National Electrical Code (NEC 800 CEC Section 60) or applicable local code. Wiring methods shall be in accordance with the National Electrical Code/NFPA 70/ANSI, and with all local codes and authorities having jurisdiction. Wiring should be UL Listed and/or Recognized wire suitable for the application.

1. Connect the camera to a PoE port on 100Mbps network PoE switch using an Ethernet cable.
2. If the camera is powered by an outside power supply, connect the power wires from the external power supply (12VDC) to the power connector.
3. Connect the PoE switch to your computer's network port using an Ethernet cable.

LED	Status	Description
Green	Quick Flashing	Link has been established
	Slow Flashing	Normal operation
None	None	No Connection

## Alarm I/O Functions

Connect the Alarm In (DI) connector to the alarm input sensor and connect Alarm Out (DO) connector to the alarm output signal. To avoid any damaged, please follow the specification of the part as below:

Alarm In (Dry Contact)	Alarm Out (Dry Contact)	
V sense	V sense	I sense
5V±5%	3.3V±5%	10mA (max)

## Audio

Connect the Line In connector to an audio devices output such as a microphone, and connect the Line Out connector to an audio devices input such as a speaker.

**NOTE: The Line In audio input requires the source to have amplification.**

## Reset to Factory Default

1. Press and hold the reset button for 2 to 5 seconds and release the reset button. The camera will reset to factory default except the network settings.
2. Press and hold the reset button for more than 5 seconds and release the reset button. The camera will reset to the factory default settings.
3. Additionally, a user can reset the camera to factory default via camera web interface or AV IP Utility

# Camera Discovery, Setup, and Configuration

For camera discovery and setup, the Costar Camera Utility is recommended. The software can be found by scanning the QR code on the camera's box or at: <http://www.arecontvision.com/software.php>

The Costar Camera Utility can discover cameras, check the status of a camera, change camera settings, import and export camera settings via a .csv file, and update firmware and/or hardware from virtually anywhere with a network connection.

Whether used for large installations that require an update to multiple settings, or smaller installations where only one camera needs a change, the Costar Camera Utility tool is efficient and convenient for mass or single camera uploads.

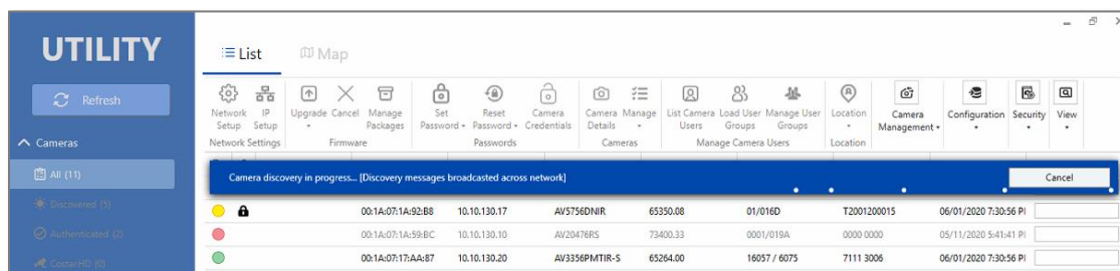

The Costar Camera Utility is compatible with all AV Costar and CostarHD cameras. The user manual for the software is available on our website.

## Camera Discovery

1. Locate and double click Costar Utility shortcut on the desktop and login.

2. When the Costar Camera Utility is launched, it will automatically search the network for AV Costar and CostarHD cameras on the network and over a time interval. You can also manually search cameras by clicking the “Refresh” button.

3. You can access the camera web user interface by typing the camera IP address on the preferred web browser.

## Web Interface Navigation

The entire menu categories are located on the top of the web interface, and clicking on any one of the buttons will cause left side of the page to jump to the settings section for the selected button.

The following are the camera settings available on the top of the web interface:

**The following are the camera settings available on the top of the web interface:**

- **Image**
  - Basic Image Settings
  - WDR (Wide Dynamic Range) Settings

Menu	Feature	Description
<b>Zoom &amp; Focus</b>  Zoom : <div> <div>+20</div> <div>+5</div> <div>+1</div> </div> <div> <div>-20</div> <div>-5</div> <div>-1</div> </div> <input type="checkbox"/> Enable Auto Focus After Zoom  Focus : <div>DONE</div> <div> <div>+20</div> <div>+5</div> <div>+1</div> </div> <div> <div>-20</div> <div>-5</div> <div>-1</div> </div> <div>Full-range Focus</div> <div>Short-range Focus</div> <div>Stop</div>  <div>Reset Zoom and Focus Position</div>	Manual Zoom/ Focus: +20, +5, +1, -20, -5, -1	Numbers indicate the level of Zooming/ focusing in order to adjust the field-of-view.
	Enable Auto Focus Zoom	Camera will do Auto Focus after changing zoom lens group position.
	Full-range Focus	Best for scenes that are completely out of focus. The camera automatically scans the full focus range of the scene to find the best focus position.
	Short-range Focus	Best for scenes that are slightly out of focus. The camera quickly fine-tunes for a precise focus position.
	Stop	Stops any command in progress.
	Reset Zoom and Focus Position	Resets Zoom and Focus lens groups to zero position

## Image

Menu	Feature	Description
<b>Image</b> 	Brightness	Controls the overall brightness of the camera image and works in conjunction with the exposure controls to maintain the image brightness.
	Sharpness	Controls sharpness and edge definition of the image. Setting this to lower levels may make overall image appear a bit softer while causing lines and edges in the image to look smoother.
	Saturation	Controls the color saturation of the image.
	Contrast	Manually controls Gamma level (affects the overall luminance of the image).
	Hue	Configures the overall hue of the image, the range is 0 ~ 100. Increasing the value will adjust the image hue towards red. Decreasing the value will adjust the image hue towards blue.
	Rotate Image: <input checked="" type="radio"/> 0 <input type="radio"/> 90 <input type="radio"/> 180 <input type="radio"/> 270	Digitally rotates image 0°, 90°, 180°, or 270°. 0, 90, 180, 270
<b>Mirror Image</b> <input type="checkbox"/> Flip Vertically <input type="checkbox"/> Flip Horizontally <input checked="" type="checkbox"/> Auto White Balance	Mirror Image: Flip Vertically Flip Horizontally	Flips the image horizontally (flip left-to-right) or vertically (flip top-to- bottom). They can be selected at the same time.
	Auto White Balance	Checkbox enables the automatic white balance feature of camera, which will automatically remove unrealistic color cast so that white color is rendered white in the image.

Menu	Feature	Description
<b>WDR Mode</b> <input checked="" type="radio"/> Auto <input type="radio"/> HDR : 10  <input type="radio"/> DWDR <input type="radio"/> LDR <input type="radio"/> Manual DAY LDR LOW LIGHT LDR B/W LDR <input checked="" type="checkbox"/> Auto Exposure	Auto	Auto detects bright backlight, glare or high contrast lighting and automatically selects the WDR level.
	HDR	Manually adjusts the intensity of backlight compensation.
	DWDR	Digital WDR (DWDR) is to enhance dark areas by adjusting the gamma value.
	LDR	Will not combine long and short exposures into one frame, resulting in better low light performance.
	Manual  DAY LOW LIGHT B/W	Allows manual configuration of WDR by selecting the WDR level for the three lighting environment types (DAY, LOW LIGHT, B/W). The choices for each lighting environment are the same as the choices above LDR, AUTO, HDR, DWDR.  Note: Manually adjust the HDR backlight compensation in the main HDR section above before selecting HDR for a lighting environment.
	Auto Exposure	Automatically adjusts illumination and exposure values.
<b>Stream Profiles</b> <input checked="" type="radio"/> Balanced Mode <input checked="" type="checkbox"/> Slow Shutter <input type="radio"/> Quality Mode <input type="radio"/> Moonlight Mode <input type="radio"/> Custom Exposure Mode Exposure (ms): 33 	Stream Profiles:  Balance Mode -Slow Shutter  Quality Mode	<b>Balanced Mode:</b> Limits exposure time from 0.1ms to 66ms. The camera will keep highest FPS when <b>Slow Shutter</b> is unchecked.  <b>Quality Mode:</b> Limits exposure time from 0.1ms to 200ms. This mode is a good compromise between reducing noise and motion blur under most lighting conditions, but with an increase in motion blur under low light conditions.

<p><b>Stream Profiles</b></p> <p> <input checked="" type="radio"/> Balanced Mode   <input checked="" type="checkbox"/> Slow Shutter  <input type="radio"/> Quality Mode  <input type="radio"/> Moonlight Mode  <input type="radio"/> Custom Exposure Mode         </p> <p>Exposure (ms): <input type="text" value="33"/></p> 	<p>Moonlight Mode</p> <p>Custom Exposure Mode</p>	<p><b>Moonlight Mode:</b> Limits exposure time from 20ms to 500ms. This mode produces the best image quality under very low light conditions with the least amount of image noise. The trade-off is in favor of low noise at the expense of high motion blur.</p> <p><b>Custom Exposure Mod:</b> Enables manual setting of exposure time between 1 and 80ms. Shorter exposure times reduces motion blur for applications such as monitoring fast moving objects and reading license plates. The trade-off is an increased level of noise. It is recommended that this mode be used only when there is constant scene illumination sufficient to provide a quality image.</p>
<p><b>Lighting Compensation Frequency</b></p> <p> <input type="radio"/> 50hz  <input checked="" type="radio"/> 60hz  <input type="radio"/> Custom         </p> <p>Frequency (Hz): <input type="text" value="130"/></p> 	<p>Lighting Compensation Frequency:</p> <p>50hz, 60hz, Custom</p>	<p>Prevents flicker caused by the power line frequency of lighting. Chooses 50Hz for Europe and China and 60Hz for US and Japan. This parameter will have no effect when the dominate light is sunlight. Or, user can select frequency between 5Hz and 255Hz. It will be enabled when user select "Custom."</p>
<p><b>Day/Night Mode</b></p> <p><input checked="" type="radio"/> Automatic</p> <p>Day to Night Switching Level: <input type="text" value="40"/></p> <p><small>*Selecting higher value for switching at higher lux level.</small></p>  <p>Night to Day Switching Level: <input type="text" value="80"/></p> <p><small>*Selecting higher value for switching at higher lux level.</small></p>  <p> <input type="radio"/> Day  <input type="radio"/> Night  <input type="radio"/> Schedule Day Mode         </p> <p>Start: <input type="text" value="6"/> : <input type="text" value="0"/> (hh:mm)</p> <p>End: <input type="text" value="18"/> : <input type="text" value="0"/> (hh:mm)</p>	<p>Day/Night Mode</p> <p>Automatic</p> <p>Day</p> <p>Night</p> <p>Schedule Day Mode</p>	<p><b>Automatic:</b> Enables the camera to automatically switch from day mode to night mode. User can define the switching level from Day to Night or Night to Day.</p> <p><b>Day:</b> Forces the camera to stay in day mode.</p> <p><b>Night:</b> Forces the camera to stays in night mode.</p> <p><b>Schedule Day Mode:</b> User defined times that the camera remains in night mode.</p>
<p><b>IR Control</b></p> <p> <input checked="" type="radio"/> Smart IR  <input type="radio"/> On  <input type="radio"/> Off         </p> <p>IR Level: <input type="text" value="50"/></p> 	<p>IR control:</p> <p>Smart IR</p> <p>On</p> <p>Off</p> <p>IR Level</p>	<p><b>Smart IR:</b> Automatically adjusts output in response to the distance of an object in view to prevent overexposure when the object is very close to the camera.</p> <p><b>On/ Off:</b> Manually turns on or off the IR LED array.</p> <p><b>IR Level:</b> Manually adjusts the IR intensity.</p>
