

LENS4-10AI Vari-focal Auto Iris Lens

Arecont Vision Megapixel Vari-focal Auto Iris Lens

LENS4-10AI 4-10mm Vari-focal Auto Iris Lens

LENS4-10AI **vari-focal auto iris** lens is used in conjunction with Arecont Vision **1.3MP to 5MP MegaVideo® AI version** cameras to **open or close the iris automatically** and maintain the same amount of light coming into the Sensor.

This keeps the picture from becoming too bright or too dark to deliver the **best image quality** in environments with **changing light conditions**.

Arecont Vision Advantages:

Comparing traditional security auto iris lenses, Arecont Vision LENS4-10AI has these advantages:

- Sharper images
- Less chroma aberration
- Better relative illumination
- CS mount
- Large optical format: 1/2"

Specification sheets subject to change without notice.
