

Arecont Vision[®] Technology Partner Program Stores and Extends Video with Veracity

Manufacturer of Storage and Network Products is Now Program Member

Leading the Way in Megapixel Video™

Los Angeles, CA (6 June 2016) – [Arecont Vision[®]](#), the industry leader in [IP-based megapixel camera technology](#), has announced that Veracity, a leading manufacturer of storage and network products, has joined the Arecont Vision Technology Partner Program.

“The Arecont Vision partnership has allowed Veracity to innovate new transmission products that accelerated the growth of the megapixel marketplace,” said Scott Sereboff, CEO of Veracity. “The COLDSTORE storage system has been tested and in use in Arecont Vision’s MegaLab for several years. Having access to over 130 real megapixel cameras rather than using simulation software when combined with the top-tier video management software selection in the MegaLab allows us to ensure that we continue to provide the best integrated solution for our customers.”

“The innovation that Veracity built into the COLDSTORE storage system mirrors the outside-the-box thinking that Arecont Vision has continued to bring to the security market,” said Jason Schimpf, Director of Sales Operations and Partner Relations. “Our end user customers and integrators will benefit from having these products integrated together.”

The Arecont Vision Technology Partner Program includes sales, development, and support contacts between the two companies in order to better engage with end user customers and integrators, integrate new features and technology, and resolve customer support issues.

###

ABOUT ARECONT VISION

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras. Arecont Vision products are made in the USA. MegaVideo[®] and SurroundVideo[®] massively parallel image processing architectures are now in their 5th generation and represent a drastic departure from traditional analog and network camera designs. All-in-one products such as the MegaDome[®], MegaView[®], MegaBall[®], and MicroDome[®] series provide installer friendly solutions.

ABOUT VERACITY

Veracity manufactures ground-breaking surveillance storage systems, industry-leading network transmission devices and direct to storage products, including the world's only storage system specifically designed for video surveillance. We collaborate with 8 out of 10 of the largest surveillance industry and IP camera manufacturers globally and develop solutions which are trusted by thousands of integrators and end-users.
