

Arecont Vision[®] Technology Partner Program Expands Actionable Intelligence with Viakoo

Industrial IoT Innovator is Now Program Member

Los Angeles, CA (31 May 16) – [Arecont Vision[®]](#), the industry leader in [IP-based megapixel camera technology](#), has announced that Viakoo, an Industrial IoT (Internet of Things) company, has joined the Arecont Vision Technology Partner Program.

“Video surveillance is one of the most important aspects to a critical infrastructure company,” said Bud Broomhead, CEO, Viakoo. “In many cases, the video application, camera network, or storage is not properly specified or configured for high resolution video. Our software automatically and accurately pinpoints the issue and provides suggestions on how to fix it quickly.”

“Arecont Vision was one of the very first partnerships we built when Viakoo was launched,” said Broomhead. “We are very excited about becoming part of the Technology Partner Program and the benefits it will bring to customers.”

Viakoo provides Operational Intelligence for IP-based physical security environments like access control and video. They have built an extensible cloud-based Industrial IoT framework and implemented their first solution for the management of physical security systems. Viakoo’s products continuously monitor the entire physical security network and delivers alerts, diagnostics, and performance metrics to ensure physical security uptime.

“System uptime is absolutely critical when it comes to video surveillance,” said Jason Schimpf, Director of Sales Operations & Partner Relations, Arecont Vision. “Having

Viakoo as a Technology Partner Program member gives our customers visibility to the performance of their security system and helps to ensure critical video from Arecont Vision cameras is being recorded at critical times.”

The Arecont Vision Technology Partner Program includes sales, development, and support contacts between the two companies in order to better engage with end user customers and integrators, integrate new features and technology, and quickly resolve customer support issues.

ABOUT ARECONT VISION

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras. Arecont Vision products are made in the USA. MegaVideo® and SurroundVideo® massively parallel image processing architectures are now in their 5th generation and represent a drastic departure from traditional analog and network camera designs. All-in-one products such as the MegaDome®, MegaView®, MegaBall®, and MicroDome® series provide installer friendly solutions.

ABOUT VIAKOO

Operational Intelligence (OI) is a new category of real-time dynamic business analytics that deliver visibility and insight into data, streaming events and business operations. Viakoo quickly detects failures, diagnoses the problem, then alerts users to the problem, and tells them how to fix it. By leveraging purpose-built technology, users gain critical insight into physical security networks, capturing valuable operational performance information and eliminating downtime. Viakoo Inc. is an Industrial Internet of Things (IoT) company, located in Mountain View, California, USA.
