

## **Arecont Vision<sup>®</sup> Technology Partner Program Welcomes Wren Solutions**

*Camera Housing Manufacturer is Now in MegaLab*

The Power to See  
Your Business<sup>SM</sup>

Los Angeles, CA (April 24, 2017) – [Arecont Vision<sup>®</sup>](#), the industry leader in [IP-based megapixel camera technology](#), has announced that Wren Solutions, an industry leader in developing innovative camera housings and accessories, has joined the Arecont Vision Technology Partner Program. Multiple Arecont Vision cameras are certified with Wren Solution housings.

“We are excited to further develop our partnership with Arecont Vision”, said Andrew Wren, President of Wren Solutions. “Our business has been built on understanding customer needs and finding unique ways to solve their problems with our innovative products. This partnership will allow Arecont and Wren to work together to bring new solutions to the market – with our stainless-steel housings serving as a great example of both companies working together to serve our customers”.

Wren Solutions has a 30-year history of developing products that solve specific problems for a variety of vertical markets, including industrial, transportation, marine, food processing, retail, banking, and education. With in-house design teams and on-site fabrication capabilities, Wren takes market feedback from idea to product in a short time.

Arecont Vision is the leader in single- and multi-sensor megapixel camera technology, designed and manufactured in the USA. Since introducing the industry's first megapixel cameras in 2004 and first multi-sensor cameras in 2006, Arecont Vision cameras have been customer proven around the world for use day or night and in and outdoors, with high performance and outstanding reliability. Wren enclosures are another important option Arecont Vision customers can now employ with confidence.

“We are very pleased to have Wren solutions as part of the Arecont Vision Technology Partner Program,” said Jason Schimpf, Director of Marketing Programs, Arecont Vision. “The Wren stainless steel dome enclosures enable our customers to take full advantage of excellent image quality delivered by Arecont Vision cameras in harsh areas like extreme moisture or corrosive environments. Customers can feel confident in the solution when they pick Arecont Vision cameras that are certified with Wren’s housings.”

Through the Arecont Vision Technology Partner Program, sales, development, and support contacts are established between the two companies to better engage with end user customers and integrators, integrate new features and technology, and quickly resolve any customer support issues. A growing number of customers are already benefitting from integrated Arecont Vision and Wren Solutions.

###
