

Arecont Vision® SurroundVideo® Omni G2 Named MVP at Start of ISC West 2016

Las Vegas, NV (April 5, 2016) – [Arecont Vision®](#), the industry leader in [IP-based megapixel camera technology](#), has received a Security Sales and Integration Most Valuable Player (MVP) award for the new SurroundVideo® Omni G2 omnidirectional multi-sensor camera. The new member of the SurroundVideo Omni family will be on display at ISC West 2016, Sands Convention Center, Las Vegas from April 6-8 in the Arecont Vision booth #8045.

Security Sales and Integration Magazine presented the award to Arecont Vision in a ceremony held earlier today at The Venetian Hotel, Las Vegas. The new multi-sensor megapixel camera was recognized in the “Video Surveillance” product category of the MVP security industry awards. Senior Vice President Raul Calderon and Vice President of Product Development Brad Donaldson received the award on behalf of Arecont Vision.

The ground-breaking design offered by the SurroundVideo Omni camera series includes the ability to easily move each of the remote-focus sensors around the magnetic, 70+ placement-point omnidirectional track and multiple lens options. The newest SurroundVideo Omni is the new G2 model which won the MVP award today. The SurroundVideo Omni G2 adds 3-axis gimbals for an increased range of sensor motion for further user customization of the field of view, and faster frame rates than previous models.

“No other camera can provide the level of situational awareness for so many applications that the SurroundVideo Omni G2 delivers. Arecont Vision was 1st to market with the original SurroundVideo 180° and 360° multi-sensor, multi-megapixel panoramic camera series beginning in 2006, and we have continued to deliver new features and advanced capabilities to the product family ahead of any other vendor,” said Donaldson. “The SurroundVideo Omni series addresses even wider customer requirements by providing a user-defined choice of omnidirectional coverage of 180, 270, or 360°, and anywhere in between. Typical deployments are for hallways, intersections, lobbies, loading docks, retail stores, restaurants, meeting rooms, street corners, walkways, atop emergency call boxes, and for many other open spaces both indoors and out.”

SurroundVideo Omni G2 was chosen by a panel of industry leaders along with the editors of *Security Sales and Integration Magazine*. As defined by the publication, judging criteria included innovation, functionality, competitive advantages, benefits to the installer or monitoring provider, and benefits to the end user.

To see the SurroundVideo Omni series of cameras in action, please visit the Arecont Vision booth, #8045 April 6-8 at ISC West.
