Industrial Ethernet Switches

Edge connectivity

Designed specifically for use in unconditioned environments, KBC Networks' new range of Ethernet switches provide edge connectivity for industrial Ethernet systems. Simple to install and easy to operate, the ES Range includes both unmanaged and managed models with configurations that are ideal for a variety of applications. Features include an operating temperature range of negative to 60°C, high-speed redundant ring technology and dual redundant power supplies.

Structure Mesh

Structure Mesh is a mesh-based wireless infrastructure solution that provides up to 400 MBps indoors and 300 MBps outdoors. It is a cost-effective alternative to traditional wired solutions like T1, Fast Ethernet and DSL, providing a viable alternative to traditional wired solutions. Structure Mesh enables delivery of services over wireless, including video surveillance, VoIP and high-speed backhaul. Integrated spectrum management software tools support easier deployments. Firetide.

Electronic Locks

Networking options

The AD-Series of electronic locks from Schlage enables users to customize their facility with networking options, interchangeable credential readers and more. The locks' patent-pending modular design allows the solution to be customized to fit an application now, and then change to meet future needs without removing it from the door. The products are scalable for installations with one door or hundreds. Ingersoll Rand Security Technologies.

H.264/M-JPEG Camera

Digital PTZ

Available in color, a day/night and color auto-iris version, the AV2805 from Arecont Vision enables users to select H.264 or M-JPEG compression codecs, depending upon their particular application. Users also can leverage the digital PTZ capabilities included in the camera, along with multiple zoom windows while recording the full field-of-view in full HD 1080p. With the AV2805, it also is possible to use post-event forensic zooming to extract recorded details from the video archives. Arecont Vision.
